

WindVOiCe®

Wind Vigilance for Ontario Communities

A Self-reporting Survey of Adverse Health Effects Associated with Industrial Wind Turbines: The Need for Vigilance

March, 2011

by

Carmen Krogh, BScPharm

Lorrie Gillis, Process Administrator

Nicholas Kouwen, PhD., PEng, FASCE (Scrutineer)

For Immediate Release

It was announced that effective midnight February 15, 2011, the WindVOiCe® survey (Wind Vigilance for Ontario Communities) was being discontinued. Launched early March 2009, the purpose of WindVOiCe® was to document the adverse health effects being reported by those exposed to industrial wind turbines sited near homes.

Carmen Krogh, Co-Founder of WindVOiCe® stated, "The disturbing WindVOiCe® results are so compelling, that in discussions with social scientists and specialists in the field of research, ethical concerns support the discontinuance of the survey in favour of a formal health study."

However, discussions with WindVOiCe® volunteers and those being negatively affected by new projects, have raised concerns that if the survey were discontinued, there would be no voice for those experiencing symptoms. As a result, a revised version of the WindVOiCe® questionnaire is now available.

Therefore WindVOiCe® will continue to fill the void due to a lack of Federal and Provincial vigilance and long term surveillance programs regarding the impact of industrial wind turbines on human health. It follows the principles of Health Canada's *Canada Vigilance Programs* for self reporting suspected adverse health effects for consumer and prescription drugs, vaccines and other products

The same confidential toll free number 1-888-700-5655 is still in service to support those experiencing adverse health effects.

Final Results of the Original Survey ending February 15, 2011

This is the seventh and last update of the original WindVOiCe© health survey results.

The new total has now reached 131 which include reports from other jurisdictions. This is a disturbing increase of 147% from the original 53 reports in April 2009.

Researchers and those reporting adverse health effects continue to report altered living conditions.

Sleep disturbance is the most common health complaint. Some describe the annoyance, stress and sleep disturbance being experienced. Symptoms include inner ear problems, cardiac concerns such as arrhythmias and palpitations, headaches and cognitive and mood disturbances. Several have suffered acute hypertensive episodes which are serious.

The American Wind Energy Association/Canadian Wind Energy Association sponsored report acknowledge that wind turbine noise may cause annoyance, sleep disturbance and stress which have serious health implications.

Current research demonstrates that annoyance must not be trivialized. Annoyance is acknowledged to be an adverse health effect which contributes to sleep disturbance, stress, and an increased risk of regulation diseases. Wind turbine noise is associated with psychological distress, stress, difficulties to fall asleep and sleep interruption.

Respondents report disturbed living conditions and loss of quality of life and enjoyment of their homes and property and financial loss due to the negative impact to the health of their families. Some describe the annoyance, stress and sleep disturbance being experienced.

Some have had to leave their homes in order to protect their health. These reports are consistent internationally.

This report is divided into two parts: The first part consists of the tabulated responses to questions in the survey. The second part consists of **victim impact statements**. These are both revealing and disturbing.

There are unanswered questions about children, infants, and the unborn, family members and workers such as farmers and technicians who live and work in close proximity to wind turbines. More respondents continue to come forward while some may be silent due to non-disclosure agreements in leasing contracts with wind developers or due to legal advice.

It is incumbent on governments to invoke the precautionary principle and declare a moratorium on further development until independent human health research has been conducted.

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

It is imperative that where respondents are reporting adverse health effects, industrial wind facilities be decommissioned.

Part 1: Tabulated responses

#	Age	Gender	Occupation	Distance from turbine	Time at property	Health altered	Headaches	Palpitations	Excessive tiredness	Stress	Anxiety	Tinnitus	Hearing problems	Sleep disturbance	Migraines	Depression	Other	Approached doctor	Altered quality of life

Part 2: Victim Impact Statements

Please note: Comments are transcribed exactly as submitted by respondents.

Date Tabulated: March 21, 2009:

#1

8)[health affected] not sure at this time

10) [quality of life altered] The noise of the turbines is what bothers me. On a windy day, they can sound like a jet is coming right at you. They are much louder than we were led to believe they could be.

In the summer when we have the windows open we have to sleep with the fans running to drown out the constant pulse of the windmills. In the winter, when it is windy, you can still hear & sometimes feel the pulsing of the windmills right through the walls.

Thankfully, the 3 closets windmills to our home are not lined up so they are not aimed at our residence at the same time.

More research into the effects of windmills should definitely be undertaken. We don't need neighbourhoods of people who have to vacate their homes b/c we have allowed turbines and their owners to take over & their effects on birds & animals. Why not people too.

11) We have not had a dog since the wind turbines were erected. We used to have barn cats, but there have been none in the barn this year.

#2

8)[health affected] No

10) [quality of life altered] On windy days we hear the turbines. Bothers me when sleeping during summers with the windows open.

#3

9)[other] High blood pressure 217/124

Had a foot that don't heal until I moved out of the house

Yes [contact doctor] Blood pressure, urine test, Doppler test, heart machine, on blood pressure pills now (Mavik 1Mg) Trandolapril [sp?]

10) [quality of life altered]

1. Had to move out of my home, just come home now to feed the cattle.
2. Our home can't be sold due to the problem per real estate agent.
3. Family events can't take place at home
4. Financial problems due to keeping two homes
5. Always sick, depressed and bad tempered when at home but when away for a short time feel much better. (Much better in the second house which I had to buy)
6. Had family problems until we moved out.
7. Feel no cares or believes us.

Bottom line:

They took life away as we knew it before the wind farm, same house value Φ sick all the time, financial stress now, world turned upside down.

11) 2 house dogs always sleeping, ear problems itching all the time. Moved the dogs out of house now they are fine.

#4

9)[other] Legs sore all the time

Blood tests, ear testing, eye testing

10) [quality of life altered]

1. Moved out of house July 2008 until present time
2. Family problems because of family living in two places
3. Our finances are not as good because of living in two places
4. All family events including Christmas has not been in our family home
5. I always felt sick and very depressed when I was in the house and went to bed to try to get away from it.
6. The wind farm didn't seem to care.
7. No one should have this happen to them we were fine before the wind farms came

11) Yes 2 dogs always sleeping, itching, ear problems. Now they are fine when they are in different home.

#5

8)[health affected] Yes for sure!

10) [quality of life altered] I can no longer sleep at all in the summer with my window open because the noise drives me nuts. I also hear it sometimes when the windows are closed. The scenic landscape has been ruined both in the day and at night. I have had people over and we would be sitting outside at night and they tell me that those red lights would drive them crazy.

It would be hard for me to say what is worse the noise or the lights.

11) – Dog – yes now when I let him out at night He is Hyper and runs out and barks at nothing.

#7

8)[health affected] Yes, I have lost sleep, my appetite and gained headaches.

9)[other] Not yet I will contact my doctor for a check up regarding my health.

10) [quality of life altered] I have lost sleep and suffered headaches. Last year in March 2008 for one week I suffered nasty headaches, I had no appetite and could not sleep. Never before have I endured such painful headaches in my life.

#8

8)[health affected] Yes, I have performed electrical pollution testing in the homes affected and now have similar symptoms as the affected residences

9)[other] No have not consulted a doctor

10) [quality of life altered] Depending on wind direction and wind speed can hear closest turbine in our bedroom at night.

#9

10) [quality of life altered] Sleep disturbance has been the biggest thing, falling asleep for a short time and then waking up with difficulty (an hour or two) to get back or else not falling asleep at all until 2 hours after going to bed.

#12

8)[health affected] GEATLY AFFECTED.

9)[other] High Blood Pressure

Seen Doctor and have been put on Blood Pressure Medication. Chest X-ray

10) [quality of life altered]

- We have electrical pollution in our home
- Turbine noise heard in home and outside
- Causing sleepless nights, headaches, and ringing in our ears.
- It has dropped the value of our home
- Loss of enjoyment of our home
- Because of the electrical pollution our family cannot come home to visit because it is dangerous to their health.

#13

9)[other] DR. XX has given me a medical letter stating before late 2007 I had not been seen at his office for any of the symptoms listed below.

April 30/08 Dr. XX – complaint humming in ears, anxiety, stress, sleep disturbances. Removed wax from ear (rt) prescribed Rx meds for anxiety and stress. May 27/ Audiologist testing. July 15/08 Dr. XX – heart palpitations – halter monitor X 48 hrs. July 7/08 Audiologist – check tinnitus match – 3000Hz @ 15db Oct. 1/08 Dr. XX – same complaints / recommends - avoidance of home.

10) [quality of life altered] Everything in my life has changes since the town_x Wind Turbine Project company_x has been in operation. I feel my health has been compromised. I have felt generally unwell physically and mentally since March 24/08. Also Sensitivity to white noise and sounds has increased. My ears are either humming or feeling pressure on them / heart palpitations continue usually while sleeping. My anxiety and stress levels continue to be high. We have discouraged our two daughters and son-in law from visiting. They have also experienced health issues when visiting. The damage that has been done to my body – scares me what will happen in the future. At 60 – I wanted to enjoy my retirement with reasonable good health and now everything has blown up in our faces. We spent 5 weeks in Florida Jan 26 – March/09 improvement in health. Loss of enjoyment of working outside with flower beds and yard. Our property value has been greatly decreased. We are still having problems with electrical pollution. Constant reminder in every direction of our property – turbines. A very uncertain future!!

#14

10) [quality of life altered] Pays some bills with the extra income.

#15

10) [quality of life altered] A little extra income doesn't hurt!

#16

Received sleeping pills

#17

8)[health affected] Unsure if it is windmill related but I do have [...checks off symptoms]

9)[other] Doctor's appt in Jan09, only change a crestor 10mg to 5mg

#19

8)[health affected] Yes during xmas 2008 I felt pressure in my head & ringing in my ears

9)[other] [visit doctor] not at this time

10) [quality of life altered] I am unable to come home to visit my parents as often as I would like. Due to my parents ongoing adverse health effects I feel discouraged & our family dynamic has change. My childhood home no longer feels like a place to relax & where I can be in a peaceful environment. I am sick over what the turbines have done to my family & community. My quality of life has definitely been affected.

11) My dog was unable to relax in this environment.

#18

8)[health affected] Yes –whenever I am there!

9)[other] Pressure in my ears or ear aches tightness feeling in my head

[doctor visit] Not at this time, these symptoms only occur around the [township] Wind Project and not at my own residence.

10) [quality of life altered] As a teacher who spends most of my summer relaxing at home& was disrupted in July/Aug 2008 when I would leave each night with my mother to drive 10 min to a hotel in Kincardine because of the above symptoms. This is something she did for months, it was disruptful for the few weeks I did it, not a peaceful relaxing environment. In December 2008 when I arrived home to my parents on the first night for Christmas the pressure in my head and ears hurt so bad that I had difficulty sleeping and considered spending the rest of the week at a relative's home away from the wind turbines. These are regular occurrences when I visit, and now sometimes think twice before going as I don't know how bad it will be this time, which makes going home no longer relaxing and peaceful like it once was. I also worry on a daily basis for the health and well being of my parents who live through this daily and the negative health impacts and stress worries me greatly. It also causes me stress that the value of my family farm has dramatically been reduced due to these wind turbines.

11) Thank you for organizing this health survey. My family greatly appreciates it.

#20

8)[health affected] Not really

11) Haven't noticed anything

#21

[palpitations] sometimes – not often

[stress] at times frustration

[tinnitus] sometimes not often

9)[other] vibration/hum in house that gets into the head & body & makes sleep impossible. Torturous some nights, some not as heavy but there. Teeth seem to tingle

No treatment – waiting for closure – do not want to take any medications. Follow up visit to come after yearly physical.

10) [quality of life altered] Noise levels very high. Whooshing noise is very irritating. Cannot sleep anymore. Have horrible vibration in the house and dog very upset. Spend nights on couch with TV and try to block out humming. Extremely tired and not functioning at cognitive and physical levels that I normally would. It is very distressing and invasive. My house is worth nothing now. I could never sell it. Angry, sad, disillusioned, exhausted.

11) Dogs & cats. 1 dog extremely antsy and whining & barking when vibration/noise levels are high. 2nd dog is just starting to show symptoms similar.

#22

10) [quality of life altered] Lack of sleep – stress and home unsellable adds to stress level. Low / 60Hz Found in home keeps one up and makes left ear ring.

11) One dog barks at night for no reason – can't sleep in bedroom.

#23

6) On windy days, there is a constant pulsing noise. It is not pleasant to listen to while trying to get to sleep.

The “flicker effect”. The turbines cast large shadows. In the last hours of the day, whole rooms at the west side of the house will “flicker” as the shadow of the windmill comes in and out of the room. The red blinking lights at night. Driving at night, there are 38 red blinking lights in an otherwise pitch black area. The lights are distracting, and an eye sore to the landscape.

11) We no longer have any barn cats.

#24

[comment] Because I have a conflict of interest, I am not signing my name but I do not want anyone else to suffer as we did for 8 or 9 months.

8)[health affected] Yes, from shortly after the turbines were put in operation until the transmission line was partly buried, more insulators put on, extra grounding done. Now, as far as I know, I am in good health again.

9)[other] Yes, until the problem was fixed. (fall of 08)

[excessive tiredness], because of electrical humming, could not get a good sleep.

[stress anxiety] of trying to get problem fixed.

[tinnitus hearing] I had earaches that got more and more severe. Please note: My spouse also developed earaches and headaches during this time but not as soon as me.

[migraines] I had a really bad migraine before I moved out for 3 months completely - did not return home at all except once to try it again briefly.

I did approach my doctor but he said he really wasn't knowledgeable about wind farms. A substitute doctor gave me an antibiotic to make sure there was no infection in my ears. I took the antibiotic but my ears just got worse.

10) [quality of life altered] Until the problem was fixed, I could not live at home. This was very disruptive to my life.

At first we thought the windmills themselves were the problem. However, once we had electrical testing done, we concluded the problem at our farm had more to do with harmonics and induction causing backfeed on the lines into our house. Putting our residential line on the same pole as the unfiltered or insufficiently filtered transmission lines from the wind turbines created this problem. Please note: The problem at our place has been fixed since last October since transmission lines were partially buried and extra insulators installed and extra grounding done on the dead pole south of the pole where the lines go underground. [wind company] did reimburse us for any expenses which we appreciated.

11) Once the turbines started up, our cats would not come in the house or go in the shed. Shortly after the electrical problem was fixed, the cats started going back in the shed again and in the house.

#27

10) [quality of life altered] I do not know if any changes have or can be attributed to the windmills because of the time span that I have lived at this residence. I would have to mention that through personal experience at work, which is very close to the windmills my life would be seriously altered if I lived any closer. I am quite surprised at how loud the windmills can be when surface wind speeds are low but wind at higher altitudes are swifter. I feel that this noise would very easily affect my sleeping as I'm a very light sleeper.

#28

11) 2 cats - no change.

#29

2 cats - no change.

#30

11) We have 50 dairy and young, 100 beef cows and young and so far no ill effects.

#31

11) No changes as of yet in our animals.

#32

11) We have a dairy farm and no we haven't seen any changes.

#33

9)[other] not approached doctor

10) [quality of life altered] not sleeping.

#34

[palpitations] pressure in chest, dull and stabbing pain in chest

9)[other] joint pain, numb face, dizziness, feeling cold a lot.

Yes, doctor is aware and looking for a referral to an environmental specialist - so far no luck - not sure what next step will be.

10) [quality of life altered] Along with the above symptoms - experiencing a general lack of wellness.

#37

11) I live on a farm. My cows and dogs are fine.

12)

#38

8) [health affected] Morning headaches and some ringing in the ears.

9) [other] No, I've not approached my doctor. I just returned from [other province] at Xmas.

10) [quality of life altered] I farm in Manitoba (8 months/year) and Ontario (4 months/year) and when I'm here in Ontario I develop headaches. I take 3 tylenol(500mg) every morning and then I'm good to go.

#39

9) [other] severe headaches, but migraines?

[doctor] No doctor

10) [quality of life altered] Headaches etc. prevent me from living my life the way I would like too. Also my home seems to be unstable the way it is, ie turbines in the vicinity.

11) Don't know

#40

Struck/hart palpetations

9) [other] Stress tests/ blood tests to numerous to count.

10) [quality of life altered] I now live on drugs that don't seem to help.

11) Livestock were all sold of due to problems that could not be explained. (Nervousness)

#41

10) [quality of life altered] Forced to sell our property, take less then what it was really worth!! This was due to health problems caused by the wind turbines.

11) Our dogs were nervous, as well as our four(4) ponies. We ended up taking our ponies too the auction barns and had them sold. Two of our dogs had to be put down!!

#44

9) [other] 1.vibration in body 2. chest and head pressure 3. heart rhythm sensations 4.nausea,queasy 5. dizziness

9) [other] queasiness, mild vibration in head and chest, heart sensations – felt like the beat of my heart changed by turbine.

[doctor] Yes, checkup.

10) I experienced severe health effects from exposure to a single wind turbine while on vacation and

never, ever want to experience these health effects ever again. The vibration and breast sensations were very frightening and debilitating.

11) [quality of life altered] I experienced this attack when exposed to a small wind turbine group of 2 turbines. The wind was moderate and my symptoms were very uncomfortable. I left the area very quickly and felt better within an hour or two. I will avoid these turbines when ever possible because the health effects are very uncomfortable and distressing. Turbines make me feel very sick when I get near them. I am OK when I leave the area where they are installed.

11)n/a

#45

10) [quality of life altered] My stress level increased while at home for the 4 months. Now within my life I am stressed and I worry about the physical health of Mom, Dad and Erin as well as friends and neighbours in the wind project. I worry about my families financial health too, whether the property has any value. At the worst i was worried about Mom and Dad marriage because of disagreement which flared up more than ever before. I did not think about the above prior to the wind complex starting.

11) No.

#46

9)[other] No. Problems with the above go away when I leave the (wind project) home.

10) [quality of life altered]I feel wound up when at home. I just cannot settle. Because of this I do not want to stay in our home or for that matter come home. the biggest change has been the effect on my Mom, sister and Dad's health, especially Mom. To see her suffering from health problems, getting sicker and sicker just pisses me off. It really bothers me a lot.

11) No.

#47

[palpitations] a lot

[tinnitus] all the time

9)[other] stomach felt full, air hurt, rapid weight loss 170 to 125lb over 3 months and loose stools, more extremely exhausted, not as patient, get angry fast.

/For weight, (Dr. at school) get weigh up since it was in the danger zone for my height.

10) [quality of life altered] For myself I was more angry. Mom and I have always been able to talk. Last winter we argued about the stupidest things. I have very, very, very low energy and just want to sleep. My family has been ripped apart with Mom not able to live at home. Not having Mom around to talk to about school or friend and personal stuff has been and is hard. Very hard.

Mom use to talk about other things, fun stuff, but windmills have become the main topic. I hate that.

11) No.

#48

[sleep disturbance] had to get to sleep upstairs.

10) [quality of life altered] The sleep disturbance - over all feeling of wellness was very poor.

11) No.

#49

[headaches] at the back of the head/neck

9)[other] A jumpy feeling as if you have had 5 cups of coffee, humming in the head behind the ears, very painful left hip, spiking pain, loose stools, cold body temp, blurred vision when winds are high, some dizziness, increasing blood pressure, nerve pain from the left ear to jaw, 2 large coldsore masses one time, shortness of breath, tight chest and knot in left chest.

[approached doctor for] ear, heart and chest.

Yes, Family Physician, May, 2008, blood tests, orders 12.5mg fluid pills, auditory assessment by ear, nose and throat specialist (order a CT scan to eliminate tumor or abnormality and hearing assessment June to August, 2008) Feb. 18/2009 Family physician Bp and cold sores - ordered double Bp meds, sleeping pills, antiviral and antibiotics, purchase Bp cuff and blood work. Feb. 22/09 Bp, heart, chest, heart monitor, emerg bed. O2 monitor, Bp, "pink lady", Nitro spray under tongue, order - change living place, 4 days off work, rest, stress reflex test. Specialist consult. Stress test (order - Bp med, change of living place or modification; reevaluate in one month.

10) [quality of life altered] I used to be able to get a solid 6-8 hours, full of dreams and nap or snooze without any effort. I have been severely sleep deprived from Nov. 2007 to May 2008, attempted rest at billets in town paid for by [wind company]When [wind company] turned off the field your whole body felt calm and like you have had a massage, humming or ringing subsided and could deep sleep. Again in the last week of Aug. 2008 to Feb. 2009 sleep deprived, waking up to 3 times or if the winds are high it seems like every hour and hard to drop off to sleep. Humming in the head occurring behind the ear and started wearing cotton batton, then over time orange ear plugs and head phones.(This did not stop the humming then latter ringing then buzzing and ringing*. The ability to hear my students even while working at the board has changed to walking across the room or asking for them to repeat louder the answers or questions. I can not listen to loud T.V. or music or sounds. At the worst I struggled to go into the [grocery] Store, the lights made ears ring and similar environments (i.e. C.T. store). Now I am more sensitive to vibrations and high frequency electrical pollution which means some high tech equipment is more annoying than prior to Nov. 2007. All symptoms subside with less exposure and sleep**. *Change - I would attempt sleep in the spare room or in the basement. **As a family we shut off and unplugged as many appliances as possible prior to trying to sleep and when home. Difficult to form thoughts to come out of my mouth. I studded on my words. When tired, I would wear a lot of extra clothes to try and warm up, too.

Family - oh, our normal problem solving skills between family members were not attempted. We were very irritable. We had loud angry arguements. I was constantly worried and concerned about the health changes in my family. That there was no way to change. We did not invite the Grand mothers over to visit much or stay over due to the concern for their health. The same can be said for inviting family or kid's friends over.

Changes - for the second time I am not home and have to help co-ordinate food, cars, laundry, mail and financial from a distance. May - June 2008 - up [at] 6:00 home to pick up [daughter] 2-3 times/week, 8:00a.m. on other days for Rugby, teach, home for setting up meals and lunches (with ears plugged and sometimes head phones), back to town_z with clothes, homework and bed. Now I am in town_y and going home every 2/day and into school(maybe). We send love over the phone or on message sheets on the counter. Have spent a massive number of hours, totally days of family time, working to get the problems resolved.

Personal Change - My love, [husband] ie worries and I worry about him and [daughter]. I truly miss being happy in my home. My home was my calm space where I could unwind after a day at highschool. No other space can replace the home where you have helped raise your family and had so many positive plans for the future. I miss [husband]. I miss [daughter]. Lost total faith in government to safeguard

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

myself, my family and other Ontario families. I do not trust the word or intentions of experts compared to before Nov. 2007.

Job Change - I love to organize, plan and teach a lesson. I have taken pride over 27 years to be able to call students by name at any point in the lesson. Change, I took 1 1/2 hours to get a lesson organized. I had trouble remembering the lesson or where I was in a lesson. I had to work so hard to remember facts which should be 2nd nature. It was hard for me to get the first word or name out of my mouth and the right students name. My co workers were extremely worried about my deteriorating health and the lack of progress with governments and companies to fix the problem. Change in 27 years I have rarely been absent for illness. Feb 22/09 I had Dr. orders to not work and I requested one week, but, my principal recommended another week to rest away from home as ordered by 2 physicians.

Financial. did not have to worry about property value. Now our home is worthless unless someone can fix this mess. I could not in any moral consciousness sell knowing how we are affected.

Outside change. I do not and have not felt like going out into the gardens which has been a calming passion my entire life since I was a child. We as a family do not sit on the deck as much due to jet sound or roaring. We close our window in the summer due to roaring jets or rattling sheet metal sound. We could not cool the house and ourselves as well, too. I will say there are probably other alterations like not being there for [daughter] as a young person needing advice and her Mom, but I am going to stop!

11) Moved Horses prior to start up of turbines.

#50

9)[other] [tinnitus] pop when turbines come on and off.

[sleep disturbance] Do not sleep a full night. Wake up quite often.

[other] nasal cavity felt like I had allergies, but no mucus, Irritable.

10) [quality of life altered] Personal - have found the changes in sleep patterns reduced energy levels, levels of patience and very frustrating and draining. Dec. on there were serious, angry arguments we normally do not have. I am very worried about my partner's, [wife], reduced sleep/rest, humming/ringing in her ears and continued deterioration of health. When [wife] had to live away from home it was hard. She is my partner and my love. We would always chat on family plans from food to finances. Our lives were upside down at all family levels when she was billeted by the windmill company [wind company] from May 2008 to July 17th and AGAIN now. She is living at her Mom's in town_y a 30 minute drive away (on Dr. orders). On a very personal level I am like a widower and sad and lonely.

Generally - Our financial outlook for our property has changed. At present we can not sell knowing the possible harm that someone may experience. This is a stressor we did not have prior to the turbines. I can't sleep with the bedroom window open in the summer for a cool breeze due to the roaring jet sound. (This was pleasant and cooling too.) I can't have a quiet sit on the deck without the jet or swoosh sound. And our phone has static on it which is not there when turbine were not here. [radio station] am channel is static or weaker in the project area.

Date Tabulated: March 24, 2009:

#51

10) [quality of life altered] The visual impact of the navigation lights has had a profoundly negative effect on our night sky. In the day-time the obvious industrialization of our landscape adds to this demoralization. When weather conditions are right the turbines can be heard from outside our house again having a negative effect on the quality of our life in the country.

11) No.

#52

6) Too close - I'm sure the bare minimum.

10) [quality of life altered] The constant changing sound changing to a horrible noise startles me, my dog and sometimes even the birds. The constant distant buzz in my head because of the substation - it's always there. The blinking red lights at night just depresses me and ticks me off. I might as well be at an airport landing strip. The same goes when I just look around. There aren't the same birds or their numbers anymore. I never see the deer anymore and to see the skyline no matter which way I turn ruined by the number of these things does give me a headache. I can count over 70 windmills from my property.

11) The cats don't go as far out back as they used to. When they're really noisy especially right before they shut down startles the dog. If it's at night, he's reluctant to go towards the noise and wants to come back in. The flyway for the swans is all windmills now so I'll see if they come again this spring as they've done for years. The owls aren't around in the numbers they were.

#53

8)[health affected] None what so ever.

10) [quality of life altered] No not at all

11) I have pets no change same as they have always been.

#54

8)[health affected] Not that I'm aware of

10) [quality of life altered] I have 2 reasons;

1. I don't particularly like looking at them.

2. If the wind is a certain way I can hear them even though the closest is 1 km. away. Some days it sounds like a jet aircraft in the distance, and some days its more of a swishing sound. It seems to vary depending on wind speed and direction. I am definately opposed to any more going up in our neighbourhood.

#55

8)[health affected] Not at all there has been no change.

9)[other] There have been no problems at all.

11) None what soever.

Date Tabulated: March 27, 2009:

#56

11) no

#57

11) no

#58

10) The flicker from the turbines can be very annoying in the mornings. When I'm training horses for 3 to 4 hours the noise gets to you and you have to stop for awhile and go to the house. In the summer when windows are open you can hear them in the house. There is also some problems with some of the neighbours around me because of stray electricity. I have not had mine checked.

11) When the turbines are noisy, the horses always go to the far side of the barn.

#59

9)[other] Yes, I went to doctor for stomach scope/colonoscopy because I was afraid I had stomach ulcer.

10) [quality of life altered] *I don't like the looks of them.

*I don't like the noise they make, I can hear them all the time.

*Shadow flickering is a problem.

*It used to be "nature" only, fields, trees peaceful but now you can only see these ugly looking windmills

*At night I hate the "red" lights on top of the wind mills blinking.

*When I go for a walk with our dog, the closer I get to windmill, the more my ears ring.

*Since they erected the windmills I felt stomach pains(still today) and went to the doctor for stomach scope and colonoscopy, all was fine but I still have stomach pains. I don't know if it has anything to do with the windmills.

*At the beginning when they put up the windmills I had anxiety problems, I hated the windmills.

*At night my wife and me wake up to some weird ringing in our ears/it comes and goes.

11) No livestock, but I know since they put up the windmills, we have not heard any coyotes or wolves howling at night, strange.

Date Tabulated: March 30, 2009:

#60

10) [quality of life altered] The only way I feel that the turbines have impacted my life is the noise when the wind is strong. Even at night it is difficult to block out the sound of the blades. I do feel badly for those neighbours who are experiencing serious health and sleep problems. It is the responsibility of the wind turbine company and/or Hydro One to ensure that their life and health returns to pre wind turbine quality.

#61

9) [other] Yes, doctor did blood tests, oral scope, prescribed sleeping pills, referred me to therapist and a nutritionist, sent me to a sleep clinic, I was vomiting blood.

10) [quality of life altered] We lived in this house for twenty years with the plan that we would pay it off, borrow money to purchase our retirement home and then sell the house to pay for the retirement home. We put the house up for sale the year before the turbines were built and real estate agents told

us, people were worried about where the turbines would be placed and the house did not sell. Now the turbines are up and I can count 30 of them from my property. My wife and I can hear them when we are outside and we experience flicker when we are inside. We can see them through every window in the house in the daytime and we see the sea of red flashing lights every night. We live in a school house we took from being vacant for twenty years to a beautiful open concept home in a quiet country setting. Our friends and family have loved our home for years but now just shake their heads when they [see] what has happened here. Don't know what's going to happen to me in five years when I'm ready to retire if I can't sell my house.

11) n/a

#62

9)[other] Not as of yet.

10) [quality of life altered] I feel like I don't wish to live here since the day the turbines have been erected in our area.....

Their distracting (flicker, etc)

Their ugly(including the switchyard out back of property)

Their noisy

They look dangerous to be around them.

I here a low humming noise while trying to sleep and I can't function as I normally could before during the day.

11)n/a

Date Tabulated: March 31, 2009:

#63

11) no changes

#64

12) no change.

Date Tabulated: April 5, 2009:

#65

09)[other] Increased blood pressure medication.

10) [quality of life altered] To bring you up to speed, I own 200 acres of prime farmland which is completely surrounded by turbines. At last count we had 37 red flashing lights, disturbing noise. AM/FM interference and shadow flicker on sunny days.

My anxiety and stress is mainly caused by the fact that we don't know what the long-term health effects will be, if any. When I read about the health problems I worry about the value of my farm which is my retirement fund.

It's interesting to note that the lawyer for [wind company] at the OMB hearing with our WAG group, is now fighting to keep windmills away from her home at [town].

I've read and kept all your letters and presentations on the subject. Keep up the good work!

11) None at the present time.

#66

08) not so far, the windmills just started up.

09) noise issue

night sky is full of flashing red lights

visibility of area with the density of windmills

#67

08) [health affected] not sure

09)[other] Been twice to the Dr. with ear problems – June and Oct, 2008, no results. Dr. couldn't find anything wrong.

11)n/a

#68

10) It causes me ill feelings to continually have to look out each window of my home to see spinning towers. At night the continued flashing lights invade a once Peaceful Sky.

Industrial Energy Projects belong on industrial zoned land.

#69

10) [quality of life altered]We bought this property to be away from the noise of the city and road traffic now all I hear is the windmills. I love to be outside, walking, hunting in our bush. Now all I hear is the windmills. Peace and quite no longer exists. The rear of our house is all windows, at night all you see is the warning lights. It is driving me crazy. We had no say in the mills because we weren't getting one. The persons that got them get paid and don't live near them. I'm sure our property value has went down because of them. This summer will be the first time we can lay by our pool and I'm sure they will drive me.

#70

09)[other] [hearing problems] not sure

[migraines] not sure – bad headache

11) n/a, No Pets.

#71

10) [quality of life altered] If these symptoms are caused by the turbines, my quality of life is effected. The windmills are a distraction when your trying to keep your eyes on the road. Also the red lights on every other one flashing at night are a sure spoiler in the nice countryside.

#72

10) [quality of life altered] The constant noise is like an alarm clock going off all the time and at sunset the flicker can make me dizzy.

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

11) N/A

#73

9) [other] I talked to a Clinic Dr., but he wasn't concerned.

The windmills are very noisy when we have a strong wind. When the sun comes up we have a shadow that makes like the lights are going off and on in the house.

10) [quality of life altered] No.

Date Tabulated: April 15, 2009:

#74

8) [health affected] maybe, but how can you pinpoint it at the windmills.

9) [Other] joints + muscle soreness.

[Doctor] Yes, but I never asked if it would have anything to do with the windmills. I have had no tests done.

8) [health affected] I'm a nature person, and I find since the windtowers have come here, there is hardly any wildlife, my bird population has pretty much deminished. I also like peace and quite which has been lost, because of the noise of the turbines. I feel tired all the time and my muscles and joints are sore and I feel achy all the time.

9) [Other] dog-having problems with his ears, vet calls it swimmers ear, but we don't take him swimming, or bath him especially in the winter.

#75

8) [health affected] Maybe – do not know how you can say for sure.

9)[other] [other] itchy EARS

10) [quality of life altered] I always feel tired. I do not like to hear the turbines. Peace and quit has been lost. I do not know what makes my ear itch by it is very irating.

11) Do[g] has problems with ears. Vet says it is swimmers EAR but we do not take him swimming.

#76

05) [wind farm near property?] None – we spend time near 'town x'.

8) [health altered]When we are in the area yes. No, as we leave the area the symptoms vanish.

#77

9)[other] spatial infringement.

10) [quality of life altered] The wind turbines are across the road from the property and one is in direct line with my driveway. Every time I go out the lane I look right at the turbine.

My home has large front windows with a pastoral view. Now it is full of wind turbines. I now have to keep the curtains pulled to avoid looking at them. I find the continuous turning of the blades quite disconcerting. At night the once dark sky is now filled with blinking red lights so again requiring the blind to be closed, definitely affecting my life. I am away for 5 months in the winter coming back in early

April so have not had the full exposure to the turbines. These wind turbines are the only ones I have seen that are built in such close proximity to homes.

It is equally disturbing to know that our politicians and so called “leaders” have such blatant disregard for individual lives. This is also applicable to so called neighbours.

Thankyou for all the work that is being done to ensure a more regulated and humane system.

Date Tabulated: May 20, 2009:

#78

9)[other] [Doctor] Discussed symptoms with doctor twice. At this point we will further monitor my symptoms and discuss possible actions (tests, etc.)

10) [quality of life altered]This previously peaceful/quiet area was to be our retirement home. We are now considering changing our plans. Any further improvement to this property is on hold.

Depending on wind direction there is a loud pulsating, intrusive swooshing noise. I seem to sense a vibration in the air and at times I seem to sense the changin air pressure (like descending in an airplane.)

I spend 80% of my time in [turbine town x] and 20% in [town y]. When in [town y] I sleep better, less headaches and more relaxed.

11) N/A

#79

9)[other] [doctor] No – I do not yet live full time at this address. If I were permanently here, I might find the symptoms severe enough to seek medical help.

10) [quality of life altered] The peace and quiet of this potential retirement home has been compromised. The noise at times is intrusive and impossible to ignore. I am also concerned about long term exposure to low frequency vibrations; as a result, our plans to retire here are on hold and may need to change.

#80

9)[other] Nausea, sound like tomtom, sharp knife-like pain in muscles, twitching in skeletal muscles and around eyes, hypertension (168/80)

[doctor] Yes. I will be following up with hearing tests at [university] which will be compared with such tests done at the Toronto Hearing Society facility. MRI test is scheduled for May.

10) [quality of life altered]In order to accommodate a condition diagnosed as fibromyalgia, I sold a four level house in Toronto and put all the proceeds into building a one level house which would handle wheel chair living. My new house just west of [town x] made my daily activities doable and my health started to improve.

When [wind company] started building industrial wind turbines I was perturbed and stressed by the presence of these behemoths and the effect they would have in this major migratory bird corridor, not thinking they would affect my life.

While I was distressed by the sight of the first phase of turbines which were more than three km from my house, it was the connection of the last six turbines erected in a semi circle around my house that brought on symptoms which I had never had before and which exacerbated the hypertension.

So now I am researching ways of regaining some of my health again although the hyperthyroid, diabetes, scleroderma, fibromyalgia conditions continue.

11) No pets or livestock but anecdotally have seen that tundra swans no longer feed in fields which have industrial wind turbines on their migration north in the spring.

[comment] These are the industrial wind turbines around my house. A & C are about 600m away, B is 700 m and D is 800m.[away] E is 1.9km.[away] G is 2.2km.[away] F is 1.9km. [away]

#81

8) [health affected] Yes – but we can't prove it.

9)[other] sore joints & sore back of hands, memory loss.

10) [quality of life altered] – due to health problems.

#82

8)[health affected] Yes – but we can't prove it.

9)[other] Joints-painful, sores on head.

[doctor] Yes regarding sores on head – all they gave was medicated salve.

10)[quality of life altered] Yes, the above health problems.

11) [pets/livestock] We are cow/calf producers. We feel our cattle are more high strung. Our calving pattern is effected – we get calves then no calves for a couple of weeks usually when we are calving, once we start we get a calf/day.

Last fall the earth worms-hundreds of them-were on top of the gravel and on top of the cement – in the morning when we saw them they were dead.

#83

9)[other] nausea, muscle pain, irritability

10) [quality of life altered] To avoid morning flicker must have blinds or avoid rooms until it passes. When warm weather arrives noise from turbines will limit opening of windows especially at night for sleeping.

Will not enjoy evenings out of doors on decks due to all the Red Flashing lights and noise.

11)N/A

#84

9)[other] irritability

10) [quality of life altered] can't be outside any length of time due to noise and in am the Flicker. Red flashing lights at night make it impossible to sit outside for long at night. Won't be able to open windows at night when warm weather comes due to noise.

11) N/A

#85

9)[other] enjoyment of my property

10) [quality of life altered] -> worry about house value

-> can't go outside – noise

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

-> every window I look out I see wind turbines

-> flicker issues at certain times of day on house walls inside & reflections on windows.

-> those things have greatly disturbed my setting and how I was use to functioning for the last 25 years at my home.

11) -> no longer see wild geese or wild turkey in the field?

#86

8) [health affected] I am severely limited in any physical work managing biosolids application company, but suffer constantly from muscle cramp pain.

9)[other] developed Parkinson's disease 2 years ago

[doctor] drugs for migraines, 12 Sinamet capsules for Parkinson's, 4 tabs Comtan, cost \$4000 year, no drug plan, poor writing due to loss of fine motor skills.

10) [quality of life altered] We hear wind noise from turbines every evening while sitting on our deck.

The setbacks are 800m, 1100m, 2000m , 1000m, 1500m, 2000m.

At nights we hear them in our bedroom a 17 year old home with R2000 standards.

Severe trembling with Right hand and foot, people think I am drunk when in town, due to some paralysis on right side. Even harassed by OPP.....[illegible]... "drunk".

11)) [pets/livestock] We keep about 20 nanny goats, for the past 20 months they have had abortions, not a single kid was born alive, all aborted before term, others died within 3 hours of birth.

#87

[disturbed by wind turbine transformer]

9)[other] [headaches] moderate to severe, daily occurrence

[tinnitus] occasionally 3 or 4 times per month

[sleep disturbance] almost nightly

[doctor] CT scan, MRI, visit to neurologist, pain management clinic, echocardiogram. All tests negative, its not me, is doctors conclusion. Pain management clinic doctor agreed that based on my chart the transformer is probably the problem since when I leave home symptoms disapate.

10) [life affected] It is very hard to work when you have a daily headache which varies from moderate to severe. It hasn't been less than slight headache in approximately 18 months. Always tired. Ringing in ears sometimes a high pitched squeal lasting for up to 10 minutes at a time. Body aches on awakening for last couple of months

Severe Headache, Pain to the point that a single shake of my head will result in vomiting. I take no medication since my doctor tries many different ones and all they would do is make me sick, did not help the headache.

List of drugs for headache that didn't work, Tramacet, Tylenol3 w. codeine, Apo Nortriptylene, Apo Propanolol, Dilavdil, Apo Hydroxyzine, Apo Naproxen, Endocet

Compared to this issue having my leg broken in two places was a picnic!

11) None.

#88

9)[other] Have no family doctor. Went to emerg currently awaiting a CT scan.

10) [quality of life altered] Constant noise, constant headaches. Sleep disturbance since the windtowers have started.

We have recently put a 500' addition on our home with large windows all around. Not only we get flickering from the towers we cannot open any windows due to the constant noise of the blades.

My occupation is a bookkeeper. These constant headaches are affecting my concentration, especially working with numbers. I work from my home. I simply cannot afford to be in ill health.

I can no longer sit on my back porch enjoying the beautiful sunsets. This was so relaxing to me. Now all I see is flickering blades and blinding red lights. The sunsets have disappeared into money hungry pockets of our government.

This area was once known as having the most beautiful sunsets in the world, now gone!

I now am a prisoner in my own home of 23 years.

This is not the future I wanted! That is why I bought this property 23 years ago. Now I am going to sell and start all over again. Extremely depressing!

11) My horses are nervous of the noise and do not focus on what they are doing. Instead they watch the windmills making this a danger when riding or training them. My dogs and cats want to stay in the house more now. This is very unusual for them.

#89

9)[other] I currently have no family doctor.

10) [quality of life altered]The measurement of one's quality of life is something difficult to qualify. That being said, I know what my life was like before the towers went up and I know what it is like now. Aside from the aforementioned health concerns there are many other factors that are of concern for myself. I have spent many years living on this property and making improvement to it. These improvements were compatible with the rural area in which I am located. Now I cannot enjoy quiet evenings (turbine noise), beautiful sunsets (turbines flashing on horizons – 67 can be viewed from my place) and star filled nights (bright and flashing lights in every direction).

These things may not seem important to those who don't live here, but they are important to me and you just can't put prices on that. My various levels of gov't has deserted me and ignore my concerns. This is not the future I had planned when I invested my energy, time and money in this place. I choose to live here for what it was, not what it has become. The addition of this wind project has upset the balance of this area and will, without a doubt, drive me from this area. This will happen with great financial loss to my family and the thought of starting over else where is almost intolerable, too much of me has gone into this – my home. Add this to the health concerns and we are looking at a disaster in the waiting.

11)I have noticed that the horses are far more nervous and more easily spooked. My dogs at times will not leave the house and are acting very out of character at times.

Date Tabulated: June 7, 2009:

#90

8)[health affected] Yes, I find myself very easily irritated. Every window in our home has at least 10 or more windmills.

9) [hearing problems] Good thing I am ½ deaf.

10) [quality of life altered] People who were good neighbours are now looking away and don't want to talk any more if they have windmills or are in favor. Our beautiful view is now gone as from my back deck I can count 72 wind mills. My property values have gone down the drain by around \$100,000. Most of the owners of the landowners with turbines on the farm do not live around here. They live many miles away.

11) My dog gets very upset when anyone comes to the door.

#91

9) [doctor] As of this time I do not have any physical symptoms

10) [quality of life altered]The present govt. has an agenda to promote these mills even though they are unreliable as a steady source of power & will only ever amount to a very small percentage of the power req'd on the grid. I live on the north limit of the [wind project] and so far I am fortunate to be as far away from the turbines as I am. However, land options have been acquired in [S. township] and I will not fair as well should they go ahead there.

I know my property value has been reduced to some degree and it is a constant worry where they will relocate to next.

With regards to noise, if the wind is blowing towards our residence they can be heard even at a km (3300') away. (Not inside the house) At night the sky is filled with blinking red lights which is something else to contend with. The above are some of my concerns which I believe contribute to increased stress & anxiety.

11) No pets or livestock

#92

9) [hearing problems] right ear only

[other symptoms] tones change in hearing, popping excessively

[doctor] Yes, My migranes and popping of ears and fatigue. Hearing tests. My tx-treatment higher enriched diet for ears, migranes. Migrane relieve advil.

10) 10) [quality of life altered] People who were good neighbours are now looking away and don't want to talk any more if they have windmills or are in favor. Our beautiful view is now gone as from my back deck I can count 72 wind mills. My property values have gone down the drain by around \$100,000. Most of the owners of the landowners with turbines on the farm do not live around here. They live many miles away.

My life has been altered slightly. When I go outside there ugly to look at, when wind is strong my symptoms are strong as well but in the long run, the windmills haven't altered my life significantly. Windmills are the future, whether I like them or not, I am one person I live for change! Do I want more around where I choose to live, the answer will be no. Do I plan to live here long? NO I noticed behaviour changes in my animals, yes, my dogs and horses shake their ears a lot but do I have testing and evidence to back up my theory? NO!

#93

5) [wind farm near property] This occurred when I visited a home in the [wind project] project

7) [how long living at property] N/A – was a visit only.

9)[other] pain below my right ear, where my jaw bone ends after visiting in this home for 4 hours. The pain disappeared after I left this home and returned to my own residence.

#94

9)[doctor] not yet.

10)[quality of life altered] Cannot sit outside anymore because the noise. Have to sleep in summer with the windows closed.

11) We have a cat who no longer wants to go outside since we have the turbines.

#95

10)[quality of life altered] The prevailing wind is from the West and we are downwind of a cluster of wind turbines which generate a lot of noise, when sleeping with the windows open. It is being heard in the bedroom.

11) Our cat stays now more inside.

#96

8)[health affected] Stress.

9)[symptoms] I have a pre-existing medical condition. Therefore this question cannot be answered accurately.

10) Noise & radio interference devalued our property

At times: "Noise" from the turbines is very annoying. At times sounds like we are living right next to an airport. Can even hear them "at times" when all our windows are closed

"Radio interference is an issue as well. Can hear the blades turning (static) through our radio

Also, they are unsightly. May have affected our property value.

11) Yes, my "therapy dog" is really apprehensive to go outside at night (to do her business) when the turbines are so noisy.

#97

8) [health affected] A little stressed

10) [quality of life altered] Somewhat. Noise from the blades turning. Radio interference. Also, may affect our property value.

11)At times: Noise from the blades stresses our dog.

#98

10)[quality of life altered] The flickering bothers us when we sit in our sunroom or deck in the afternoon. The noise is equally disturbing – especially at night sometimes we have to close our windows.

#99

8) [health altered] Yes, there may be a connection

9) [doctor] Mentioned to my Doctor outside of office, have not made an appointment. I am very healthy, thin, athletic and exercise often.

10) [quality of life altered] Prior to the installation I was always a high energy, upbeat person who slept well. Late in the fall of 2008, my wife and I started experiencing heart palpitations when trying to sleep. We can both hear our pulse in our ears. We never connected this to turbines until now. I am less

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

energetic, lacking in ambition, more moody and less optimistic. My whole state of mind has changed. It has impacted my work & home life. I cannot see or hear the turbines from my home. The symptoms were worse in the fall and winter and better in the spring. If our symptoms increase next fall and winter we will know it is linked to the turbines and wind speed/direction.

11) No pets or livestock.

#100

8)[health altered] possibly, but uncertain

9)[doctor]No. I have noticed that I have experienced heart palpitations or increased pulse, sometimes during the day and sometimes while resting through the night, which has caused some disturbance to my sleep. I am not sure if these are linked to the recent start-up of the nearby wind turbines, but I believe I have been experiencing these symptoms over the past 6 – 8 months.

10)[quality of quality of life altered] possibly, if what I have experienced is in fact linked to the operation of the turbines

Date Tabulated: July 10, 2009:

#101

9) My doctor does not understand the situation.

10) [approached doctor] My doctor does not have any information on the symptoms. I believe my quality of life has deteriorated as have my property values.

11)My dogs seem to be more clingy towards me and seem to overreact when I return after being away for several hours.

#102

10)[quality of life altered] Some days its like camping at the end of an airport.

11)Deer and turkeys moved out of area.

#103

9)[other] annoyed at visual sight as well as hearing the noise generated.

10)[life altered] Was expecting to enjoy peace and tranquility, not being intruded upon by the multitude of turbines.

#104

10)[quality of life altered] I resent the fact that WAG[wind action group] has interfered with my privacy by submitting this in my mailbox. I refuse to listen or acknowledge WAG;s underhanded methods.

#105

10)[quality of life altered] I am disgusted with the attempts of WAG to try and brainwash residents. I am sure if you checked you will find these people (WAG) to be less than truthful and very bitter. I have dealt with these people and I am glad NOT to call them friends.

11)I have livestock, no problems.

#106

10)[quality of life altered] I cannot go a day without thinking about Wind Turbines. They are everywhere you look, noisy, lights flashing.

Does the Wind Farm effect our families Health. How long does it take 1year/5 years/10 years.

I do not know exactly how much value our house has lost. 40/50/60 THOUSAND MAYBE?

If you raise a family today, How long does it take to save 60 THOUSAND DOLLARS. I believe we lost that.

One thing that could make matters worse is the idea that my tax Dollars might be subsidizing a Wind Project.

Thanks for your efforts.

#107

11) Biggest factor is the noise.

Unable to sleep with windows open at night and I'm a poor sleeper under good conditions. Find when I'm outside gardening or reading the constant noise from the blades turning very irritating and I find I have a pressure in my ears that wasn't there prior to the last few months.

Date Tabulated: July 20, 2009:

#108

6) [nearest turbine to property] There is at least one on each corner of my home (see map attached) Nearest is 481.8 meters

9) [other] Digestive problems/ chronic upset stomach

9), 10) and 11) Hello, my name is [home owner] and I had a Dream.

I knew in my early 20's that I wanted to move north and build my dream home. I was born and raised in the City, but undeniably a country boy at heart. I worked with my Father who was a Carpenter by trade for most of my life, and I naturally followed in his footsteps. This gave me the skill set and knowledge required to be able to one day realize my Dream.

It was the late 1990's and me in my early 30's, I was financially ready and began looking for the perfect spot. I would need to be close to the city to commute for work, but far enough to enjoy the Country Living lifestyle that I had been dreaming of for 10+ Years now. My search took me all over Northern Ontario and was a 3 year process.

Finally in 2001...I found it!! A 1 Acre Corner lot Located in the Township of [township]. The next step was to go thru the process of obtaining Building Permits, and designing my home to the Townships approval. For anyone that has gone thru this, they will tell you that it is a lengthy and sometimes frustrating process, but worth the reward in the end (or at least suppose to be). In 2002 I started construction on my outbuilding (barn), and in 2004 my home.

It was 2005 when I first caught a glimpse of phase 1. I was on my way home from work and saw these massive windmills being erected. My first thought was "what the heck is going on here?" and my thoughts after that I can not mention is this letter. I began making inquiries, and came to find out that [township] Township had become the new home of a [wind company] Wind Farm.

I had, and still have a hard time understanding how this could have happened without me knowing. After speaking with the Township and asking this very question, they informed me that the Residents of [township] were indeed notified, unfortunately for me the means of notification were not (in my opinion) appropriate.

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

The notification process consisted of:

1.) A notice was posted on the Township Website.

**At that time and up until 1 Month ago, I did not have internet access at my home nor own a Computer.

2) Notices were posted in the Local Newspaper.

** I was working full time and building a home on my own, I didn't have time to read the paper.

3) A notice was in the Township Newsletter that comes in the mail with your Property Tax Bill.

** With all the advertisements, flyers, pamphlets, etc...that come in the mail these days, it is hard to keep up. I am sure that many people are like me, they open it up (whatever it may be) take out the bill and recycle the rest.

At no point in time was there ever a notice or letter sent to my home, it was assumed that I would come across one of these methods of notification. I feel that this was very presumptuous of the Township and [wind company], this information SHOULD have been shared with residents via Direct mail, not left to the possibility that one might come across it.

So here I am, not even half way thru building my home and now I have these windmills almost, but not quite, in my backyard. After much soul searching I decide to forge ahead, block out the images and I concentrate on the things that remind me of why I fell in love with this land. Difficult as it is I manage not to lose sight of "My Dream".

In early 2006, comes the news of phase 2...They are not done yet! And this time they will be right in my backyard, front yard and to both sides of my house. I am surrounded.

Now the windmills in phase one have been up and operational for approximately 1 year and residents have had an up close and personal experience. They have quickly come to realize that they are not all they were cracked up to be.

After attending the Township and planning meetings for phase two, there was definitely not a positive reaction to the news of more noise makers moving into Town. Residents managed to put up enough of a fight to halt it for a short period of time, but it is very difficult to fight a Township that wants the Revenue that comes from allowing this type of project, and a Corporation the size of [wind company]. The offer is too good, the Corporation is too strong, and eventually Politics and Money win out over Resident's wishes. A modern day David and Goliath.. The giant(s) win again.

In December 2008 phase two was turned on, since then I have not slept thru the night. I have had to go to the Doctor and have sleeping pills prescribed so that I can get to sleep, but I am inevitably awakened each night.

My quality of life is and has been affected, I no longer look forward to coming home. I get a better night sleep in the city (go figure) and will spend some nights there, but why should I be run out of my home?

Summer is now upon us, I have always looked forward to this time of year. My home was built with summer as the focus, the positioning on my property, location of windows, all designed to enjoy having my windows open all summer long, and use Mother Nature's air conditioning. For this reason I do not have A/C in my home (many people out here don't.. it is (was) not necessary). Now the wind that I look so forward to each summer has become my enemy.

I have become intimately aware of the negative effects involved with living in a wind farm. It's pretty sad that I have to put my T.V on the nature channel and close my windows and doors to hear "Nature" when I live in the middle of the Country!

The more I know, the worse the scenario is. I live in the middle of what sounds like an Airport only worse, at least if I lived next to the airport I would get a break every 30 seconds, and have 'No Fly' times so I could sleep. Between the constant whooshing that echoes thru the skies 24/7, and the humming

sound that is omitted from the mechanics of the turbine 24/7, I have gone from being a very easy going, relaxed person to struggling on a daily basis with anything from stress to depression to anxiety. I attempted seeing a massage therapist and chiropractor to help relieve the tension, but this proved to only be a temporary fix, and was quite costly, so I had to stop going. Not to mention the other Health related issues that are now becoming a daily struggle. I have headaches at least every other day; and a constant ringing in my ears, I have had 2 ear infections in the course of a 3 month period, and occasionally suffer mild hearing loss. I experience digestive problems, and an upset stomach after almost every meal which will last anywhere from a few hours to days. I have gone from being a healthy person that had to visit the doctor once, maybe twice a year (one of these visits being a regular checkup) to having all these symptoms happen at once, and persist for months on end. It is all a little too coincidental, don't you think? Even guests to my home experience similar symptoms when they stay for more than a day.

I lay awake at night and trying to figure out why this has happened. I have come here to realize what has been my dream for over 20 years, and it has turned into what would be a nightmare if I could sleep. Where do I go from here? I am not only financially bound to my home, but emotionally torn. As I consider my options (none of them good) I cry.

The ironic thing about it is I am not even done yet. Just to add a little insult to injury, I have to now finish my dream so that I can walk away from it for the sake of my health.

Why was there not a proper investigation done into Potential Health Risks BEFORE putting these in people's backyards. There is/was so much research available from existing wind farms around the world, none of it was taken into consideration. Had it been, they would not be so close to residences. The required setback in phase one was 400 meters, and was increased to 450 for phase 2. This is crazy, the Provincial Government is now 'Proposing' a setback of 1500 meters from a residence, with a wind farm of this size, and a noise study is required prior to installation. I have a total of 9 turbines surrounding me, on all 4 corners of my property, [1.@481.8M](#) 2.@ 563.9 [3.@576.2](#) and [4.@619.6](#) and beside #2 is another one @ 700.5. The remaining 4 did not have distance readings available at the Township office, but are not too far from the 5 listed here. Needless to say, I am getting it from every end! I cannot go onto my property any time of the night or day ever again and experience the peaceful serenity, and sounds of nature that made me fall in love with this place, and want to build my dream home here.

My goal with this letter is to bring awareness to the issue that I and many others are dealing with. For those that don't live in the middle of a wind farm, but merely drive thru once in a while, my situation would be hard to understand. It is quite an awe to see for the occasional passer-by, but there is far more to this than meets the eye.

For the land owners that have agreed to have these turbines on their property, I would be curious to know, how much was my Dream worth? Because it is worthless to me now. And what is [wind company] and [township] Township prepared to do?

Thankyou,

[home owner]

#109

6) [how far are turbines] 481.8 meters - Total of 9 surround

9) [other symptoms] -Nausea, Dizzy (occasional) – Digestion

[approached doctor] No, symptoms stop when I return home.

10) It is difficult when you want to visit your loved ones, however, you know that you are going to an environment that will cause you harm. Not a choice anyone should have to make!

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

Essentially, the wind energy industry is forcing people to stay away from their families and loved ones, which is unacceptable!

#110

8) [health affected] yes, (mostly mental health

9) [other symptoms] cannot deal with noise

10)[quality of life altered] –cannot enjoy the outdoors and sounds of nature because of noise

-hesitate to invite friends over

-feel upset that we built our amazing energy efficient ICF home in an area full of horrible noise pollution.

-feel violated

-upset that my lonely elderly mother came to live with us to have a happier life but now has vertigo (we have not mentioned to her the possible correlation to windmills.)

-feel like we should have known better!

-we trusted township and [wind company]

#111

9) [approached doctor] yes, for tinnitus – pending

10)[quality of life] – do not feel desire to improve our house (finish work started)

-do not enjoy outdoor exercise when windy and noise from windmills

#112

9) [other symptoms] vertigo

[approached doctor] yes for vertigo – take medication

-she's never had this before.

10) [life altered] because of vertigo * we are looking after [mother] and do not wish to give her windmill details.

Date Tabulated: September 11, 2009:

#113

Young Child-Form completed by parent

9) [headaches, palpitations] too young to describe.

[hearing problems] We are having hearing re-checked. Family Dr. found swelling, excessive wax.

[sleep disturbance] sleeps but does not seem rested.

[approached doctor] Family Dr. [doc's name] suggested hearing test, documented visit, found no issues apparent – does not have knowledge of WTS but has heard some comments from local public health.

12) [life altered] I feel both my children are “different” in their behaviour – two happy, well-behaved children have become irritable and unreasonable w/temper and agitation – reminds me of an overtired or hungry child. This is compounded by the fact that my husband and I are affected and sleep deprived and I imagine have lower patience,

tolerance and are irritable also. [Child's name] describes "bees" in his ears – I believe ringing ringing from W.T. s.[wind turbines]

#114

Young Child-Form completed by parent

9) [headaches, palpitations] too young to describe.

[stress, anxiety, tinnitus] slaps his head sometimes

[sleep disturbance] sleeps but does not seem rested. Very irritable/complete change in personality.

[approached doctor] Family Dr.[doctor's name] documented visit, found no issues apparent – does not have knowledge of WTS but has heard some comments from local public health – confused by vomiting without cough but said some children with large tonsils and mucus can cause vomiting.

10) [life altered] I feel both my children are "different" in their behaviour – two happy, well-behaved children have become irritable and unreasonable w/ tempers and agitation – reminds me of an overtired or hungry child. This is compounded by the fact that my husband and I are affected and sleep deprived and I imagine have lower patience, tolerance and are irritable also. [child's name] vomits sometimes for no reason – seems to have motion sickness which I think is from wind turbines.

#115

9) [other] Flashing lights (irritation), kept waking up.

#116

9) [approached doctor] Yes, 1) heart tests 2) CT scan – ruled out stroke and or tumours.

10)[life altered] No energy – due to lack of sleep

-depression and irritability

#117

9)[other symptoms] rapid heartbeat, shallow breathing, overall sensation of being pressurized as if I could explode aggravated digestive problems, cannot relax.

10) [life altered] – cannot sell property. Municipal value @\$258,000 – listed @ \$239,000 – nobody has viewed.

- the other night I woke up because of a very loud, insistent pounding in my ears, accompanied by a headache. As I'm waking, I wonder where that noise is coming from. I am ready to holler at my neighbour across the road to turn down her radio. I then realize with concern, that it's me. That noise is my pulse racing, making the same sound the wind turbines make, but much faster. If you can imagine the beat of "Paint it Black" by the Rolling Stones, that would be the speed of my heart beating. It was a pleasant very still night and I was actually having a pleasant dream. The turbines were operating.

- this has happened 4 times that I can remember, once while awake. I find if I change position, the pounding sensation goes away.

- all symptoms are more noticable when I'm laid off (an annual event-longer each year) and in and around my house 24/7.

- I have previously attributed any problems to financial stress. I now believe that stress is being compounded by low-frequency noise.

- I don't want to take any medication in order to sleep, low blood pressure, etc. If there is a physical ailment, I believe in eliminating the source rather than treat the symptoms.

- I just want to move.

- complete lack of energy I have on a daily basis. I feel as if I could sleep all day, every day, with no incentive to do anything at all. It seems like these turbines are draining the energy out of me

11) [pets affected] not apparent.

#118

6) [nearest turbine] [turbine] transformer station

9) [palpitations] vibrations

[sleep disturbance] on most nights

[other] broken sleep, aching muscles

10)[life altered] The transformer station has been operating for over 3 years. We have had endless nights of broken sleep. I wake up tired, seem to be anxious all the time. Everything seems to upset me.

Have asked MOE [Ministry of Environment] for a letter that says there is no problem with the wind farm so we can sell our farm for a reasonable sum but they will not give us one because there is a problem.

But when you say fix the problem to MOE they say the transformers are in compliance.

What do we do!

#119

6) [nearest turbine] [turbine] transformer station

10) [life altered] Here is our history. On April 20, 2005 we attended a public meeting at the [township] township hall to hear about the proposed installation of [wind company] transformer station. The members of the community asked the township council not to pass this installation. Our fears were for noise and health effects with such a an electrical installation so close to our home(490) metres. It was passed anyway.

[wind company] installed the first transformer and energized it on February 23, 2006. We are the adjoining property owners. For the next few days afer that date, we heard a loud, penetrating buzz/hum. We wondered what was the source of the noise. Gradually, we realized that it was the transformer. It seemed to make more noise in the evening and early morning hours. The sound was more extreme with any form of water vapour in the air, either rain, frost, or fog. The noise was heard inside our house with all the doors and windows closed. We found that we could not sleep for more than 30 or 40 minutes at a time, awakening over and over again to the sound of the transformer.

We issued many pleas to council and [wind company] for help, and attended meetings for over a year. We finally appealed to the Ministry of the Environment, and the transformer noise was found to be in excess of the legal limits. Finally they constructed a noise absorbing wall and earthen berm, topped with trees. This helped dim the noise a little, but it was still disturbing. We could not get away from the noise even in the refuge of our own home. We felt pressure on our ears, like an airplane take off. At times the intensity of the noise made my ears hurt and vibrate. We were constantly sleep deprived, exhausted and stressed. I awaken to find myself with the blankets over my head. I believe this is an unconscious action to protect myself from the effects of the noise.

The OMB hearing took place October 2007, and the original [brand] transformer was ordered to be replaced with a supposedly quieter [brand] brand. At this time a second transformer was allowed to be installed, also a [brand]model. During this time period, we co-operated with [company]Engineering to do noise recording testing inside our homes. The MOE abatement officer looked at these reports and concluded that the intrusive noise was in the low frequency range, 360 hz.

The second transformer was energized in February 2009. The noise is still intrusive, but it is now coupled with a penetrating vibration in our home and even in our bodies. It is a terrible feeling. We have reported our distress multiple times to MOE and [wind company] via their noise reporting protocol telephone number. We have co-operated with [wind company] noise consultants[company]Engineering. They have done four season audits, first for one transformer, and now for the two of them. Our distress has not been heard, and their usual answer is “it’s in compliance”.

All of us here have suffered with many severe headaches, ringing ears, heart palpitations and unending fatigue. With the stress and anxiety we suffer, we can hardly think straight and are irritable and short tempered with each other. Our nerves are frayed. When will there be some relief? Will it ever end? When will we ever get a good night’s sleep again?

In an effort to try and help ourselves, we had [name withheld] do an electrical assessment of our house. His graphs showed a great deal of “dirty electricity” coursing through our home. He likened it to living in a microwave. He stated: “This is a bad house, a very bad house.” He felt that we were sensitized to the electricity and that was contributing to our health issues.

We contacted Hydro One and they have installed monitors in our home on two different occasions. The first round of tests were inconclusive and we have not received any feedback from the second set.

Our anguish is great. We feel betrayed. There is no help. This is our home, our refuge, but we can hardly stand to be here.

[homeowner’s name]

#120 [family collaborative effort #120-124]

9)[headaches] severe

[sleep disturbances] severe

[other] -mouth feels like clinching teeth (but not)

-TOTAL LACK OF CONCENTRATION,

- heavy painful chest, heart pounding

- Weight gain-can’t seem to loose the weight

- Your eyes feel like they are being “dug” out of the eye sockets

- takes more medication to do the job, as you do not respond to the medication the way a normal person would....Eg. 2 or 3 rounds of antibiotics to get over a bout of pneumonia, (immune system compromised)

- wear outdoor boots/shoes IN THE HOUSE, to try and help prevent our feet from “burning” hurting

- severe mood swings

- sores and injuries do not heal very well

- tingling in extremities, body aching(a lot),s

[approached doctor] NOTE: the family doctor is so busy with (shortage of doctors) surgery, office, covering emergency at hospital that unless another doctore speaks to him about the facts he appears to not want to acknowledge the symptoms. – heart tests – eye tests – xrays –CAT scans – Blood testing

10) [life altered] – when you don’t get a proper sleep, then you can’t comprehend everything that is going on and you can’t concentrate or remember

-you get chest pains

- you are so tired that you just don't even want to get up and going...Your weight is increasing and you can't seem to get it off

-your ears are constantly ringing and it makes it hard to hear

- NOTE: when we go away from the farm the headaches ease up,

- but to have the effects of the wind turbines ease you need to leave the farm for more than 3 weeks, at least.

11) The cattle became very aggressive at times, a lot more assisted births, abortions, prolapses, reproduction problems (symptoms too numerous to mention)

#121 [family collaborative effort #120-124]

9) [other] –nauseated, mouth feels like clinching teeth(but not)

-go to the washroom more often

-TOTAL LACK OF CONCENTRATION, cant even spell/add right, at times

- Your memory is just not what it used to be

-heavy painful chest, heart pounding

- unusual bloody noses,

- Your eyes feel like they are being “dug” out of the eye sockets

- takes more medication to control symptoms

- can't walk straight (when turbines are powering up/down quickly) equilibrium is off, inside of ear always seems itchy

- wear outdoor boots/shoes IN THE HOUSE, to help prevent our feet from the “burning” hurting feel

- sores and injuries do not heal very well(your itchy/scratching)

- body aching

- there are times(a lot) when I would go to town just to sit to get away from the effects of the turbines (ease the pressure in chest, head and ears)

[approached doctor] Heart tests,

- NOTE: the family doctor is so busy with {shortage of doctors} surgery, office, covering emergency at hospital that unless another doctor speaks to him about the facts he appears to not want to acknowledge the symptoms.

10) [life altered] –when you don't get a proper sleep, you can't concentrate r

-you get chest pains

- when I go near florescent lighting or those new light bulbs I get a severe headache and my eyes feel like they are being pulled out

- your ears are constantly ringing

- NOTE: when we go away from the farm the headaches ease up, but to have the effects of the wind turbines you need to leave the farm for more than 3 weeks, at least, and the longer you are near the wind farm the longer it takes to have the symptoms “start” easing when you leave.

11)[pets and livestock] – The cattle became very aggressive when the wind turbines were putting out the power, and there was a noticeable amount of other problems

- We used to have cats but shortly after the turbines started up they disappeared with the odd stray only staying around for a short period of time.

- You expect to have mice on a farm, but they have even disappeared.

#122 [family collaborative effort #120-124]

9) [other symptoms] –heart pounding

- Lack of memory
- ears itchy and ringing
- bloody noses, ears itchy and ringing
- body joints aching

[approached doctor] General testing – Heart tests (Holter monitor)

10) [life altered] – when you don't get a proper sleep, then you can't comprehend everything that is going on and you can't concentrate or remember,

- extreme mood swings
- at my age, I should not be having chest pains
- severe headache and my eyes feel like they are being pulled out
- your ears are constantly ringing and it makes it hard to hear

NOTE: when we go away from the farm the headaches ease up, but to have the effects of the wind turbines you need to leave the farm for more than 3 weeks, at least.

- the worst thing is: I felt I had to move totally away from this area to try and protect myself from the effects of the wind turbines!

13) [pets and livestock] - no cats – our collie became “clingy”, he would always be around humans

#123 [family collaborative effort #120-124]

9) [other symptoms] – irritated and agitated very easily

- mouth feels like clinching teeth (but not)
- TOTAL LACK OF CONCENRATION
- Weight gain-can't seem to loose the weight
- body aching,
- takes more medicine to keep symptoms under control

[approached doctor] General testing – blood tests – xrays – specialized testing

10) [life altered] – when you don't get a proper sleep,

- you can't concentrate
- your ears are constantly ringing and it makes it hard to hear
- NOTE: when I go away from the farm the headaches ease up
- I trained in Agriculture in Ontario in order to be able to take over with my sisters, the family farm and now there is no farm to take over, as the wind company does NOT appear to be trying to FIX the problem
- the worst thing is: I have had to move totally away from this area to try to protect myself from the effects of the wind turbines.

- if it is doing so much damage to our cattle what is it doing to us as people

11) [pets and livestock] –the cattle became very aggressive at times,

- a lot more assisted births,

#124 [family collaborative effort #120-124]

9) [other symptoms] – nauseated/ stomach upset

- heavy painful chest

- extreme mood swings

[approached doctor] General testing – Gastro-intestinal testing

10) [life altered]- when you don't get a proper sleep- you can't remember stuff, it affects your memory

- irritated and agitated very easily, (extreme mood swings)

- I get a headache and my eyes feel like they are being pulled out.

- NOTE: when we go away from the farm the headaches ease up and go away

- I trained in Agriculture in Alberta in order to be able to work with my sister to take over the family farm and now there is no farm to take over as the wind company does NOT appear to be trying to FIX the problem

- the worst thing is: I have had to move totally away from this area to protect myself from the effects of the wind turbines!

- when I go near florescent lighting or those new light bulbs

11) [pets and livestock] – used to have 20+ cats but shortly after the turbines started up they disappeared with the odd stray only staying around for a couple of hours, but they NEVER came back

- big change in the cattle behaviours

- a lot of calving problems

Date Tabulated: January 5, 2010:

#125

8) [health altered] visited [community with wind turbines] on bus trip

9)[other symptoms] sick to my stomach, feel like belching

[approached doctor] No because I was at [community] for a short time once I got away from the area I felt better.

10) [life altered] This is a different issue. I've lived in Europe – travelled to 19 different countries, travelled on trains in Europe, planes, here military plane I have never experienced such a disturbing noise –

People have outer body experiences this is inner body disasters. My body has never experienced this before. The inner body experience is hard to explain. One feels very ill headaches sick to my stomach feel like belching no energy and confused.

#126

6) Generator Station - 390 meters

9) [other symptoms] Nausea/vomitting

[approached doctor] He didn't know why I was experiencing these problems. I was treated with medications but nothing effected the symptoms.

10)[life altered] It has declined rapidly. I am unable to even return to my residence because when I do, I become sick. I am no longer allowed to visit my home. I have had to move in with my Grandmother.

11)[pets/livestock] Yes, They dislike being touched on the ears. My cat started acting very strange and hyper.

#127

6) transformer substation – 390 meters, power line – 100 meters

9)[approached doctor] No – waste of time

10) [life altered]

-CAN NOT LIVE IN MY HOME

-CAN NOT SELL MY HOME WHERE I HAVE EVERYTHING INVESTED

-WE HAVE NO FAMILY LIFE LEFT

-ON WEEKENDS, WHEN WE MUST RETURN TO OUR ANIMALS & GET WORK DONE, OUR DAUGHTER CAN NOT RETURN – WE MUST – VISIT WITH HER ELSEWHERE

-WE COMMUTE TO & FROM OUR HOME TWICE DAILY TO ATTEND TO LIVESTOCK WE CAN NOT YET SELL

11)[change in pets/livestock since erection of] substation, powerlines

Younger horses – nervous and tense

If horses in barn for length of time sometimes appear stoned.

#128

6)[nearest to property to] substation & powerlines

substation 390 meters, powerline approx 100 meters

grid – 100 meters

8)[health affected] substation & powerlines, yes

9) [hearing problems] more acute hearing making all environment very loud

[depression] I'm beginning to wonder if I am now in this category.

[approached doctor] – I have had my hearing tested as well as an MRI. There are no apparent problems

- I have also spent many hours with the family doctor & a naturalpath regarding my daughter.

10)[life altered] [wind]farms – yes

>We have had to relocate our family numerous times. Our family life no longer exists.

>We have livestock – we have given horses away; financially we are losing our shirts & are commuting an extra 50 kms per day to care for them.

>Our residence/farm is worth nothing

> Windfarm has taken over our lives, there is little social activity or enjoyment as everything is to the point of overwhelming.

>We can no longer host friends or family at our home but must keep up a façade that all is well

>We have no time to relax and unwind as we continue to deal with issues; (windfarm, legal, family).

>the stress and anxiety is an everyday event with concerns over our children, pets and livestock

11)[change in pets/livestock since erection of]windfarms(substation/powerlines).

I have given away our cat>cannot provide safe housing. We gave away 4 yearlings (horses) can't work with them due to their stress and our lack of time.

Date Tabulated: February 20, 2010:**#129**

6)[distance from turbine] 400m, but we have 10 within 1 mile of our home.

8)[health affected] Yes absolutely!

9)[other symptoms]My hands shake often and sometimes out of no where I feel sick to my stomach. Chest pains, off balance often.

[approached doctor] When I began having chest pains I did go to my doctor. After many tests they could not diagnose it. At that time I did not think anything of it, now I feel it is due to some sort of impact from the wind towers. They did find however that I had extremely high blood pressure for a woman my age. (I did not at that time suggest to them that I live so close to all of these wind towers.)

10) [life altered]

-The peace and quiet of my country home has been totally changed. Once able to walk outside my door and hear nothing but birds chirping and cows mooing from the farm next door, now my door opens to not only the gigantic physical obstacles of our view (the towers) but the constant annoying “whooshing” and humming sounds that they create.

-Once able to fall asleep and stay asleep with ease due to being a very busy wife and mother of two, now I am lucky to fall asleep and get more than 3-4 hrs a nite.*This is not enough to get through the day, however I have NO CHOICE but to continue on the following day sleep deprived.

-My 8 year old daughter now complains of headaches. She doesn't have any problems with her eyesight which could cause this and has never before complained.

-I feel anxious and nervous nearly everyday. My hands shake like those of a “much” older person some days. (I am only 39)

-One other major thing that has happened to me is that I have fell down. Normally this doesn't occur to me but I have felt “off balance”. One day I fell down my stairs inside my home, also while holding my 4 year olds hand. Also had a fall while outside just simply walking into my garage. My leg and knees were bruised for weeks.

-Headaches, on average 2 or 3 a week. Also I have had countless migranes, so bad that no amount of tylenol could help. I have also experienced “depression” at times which is very out of character for me, generally a very happy person.

- 11) My dog[breed] who we have had for 7 years, seems to be very nervous. She paces constantly and in the time we have had her she never has “accidents” in our home until now. One evening she went upstairs and urinated on our bed! There was absolutely no reason in our minds for this. Obviously she now does not go upstairs. I should note that on that particular night it was quite windy and the towers were extremely loud.

#130

6) [distance from turbines] approx 400m but there are 10 of them within 1 mile of our home.

8)[health affected] YES – WITHOUT A DOUBT!!!

9) [symptoms] [palpitations] not sure, [excessive tiredness]I have trouble sleeping,[tinnitus]sometimes, I've just noticed it. [other] I don't know if it's palpitations or anxiety, but sometimes my heart races like it's going to jump out of my chest.

10)[life altered]

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

- I now have great trouble getting to sleep in fact I now use sleeping pills, I never used to, EVER!!!
- I can no longer enjoy my home outdoors, There is a constant “buzzing” that I cannot escape. The further that I walk onto my vacant land, the closer I get to the neighbors tower – these towers make me feel constantly stressed and I always am anxious or have a feeling of anxiety.
- I worry about my plummeting real estate value, and if a bank will even renew my mortgage when its time.
- I’m in a position that if I complain, I fear that my property value will fall even further. [identifying comment left out]
- myself and other members of my family are now getting unexplained headaches, even my [age] year old daughter who has never had a headache prior to these towers coming online. I have a feeling of helplessness because I want to get away from the towers but we must remain due to the fact that we can’t afford to abandon our home and move.
- 11) Our dog is restless constantly pacing
- We have a lot of wildlife on our property, deer, turkey...- we rent our property to a bow (deer) hunter. He told me that he has never seen such few deer in all the years that he has been hunting here, - note that this is the first hunting season that the wind turbines were active.

#131

- 9)[approached doctor] No. What can he do about it. I do not like taking drugs because there are always side effects.
- 10)[life altered]
- Very tired feeling, go to work feeling non productive. Harder to deal with your family. I am harder on my son.
- Worst of all I have put my retirement money into this farm coming out of [place] to get away from Industry and do something good for the environment and grow heartnut orchard and pears all organically. I have excessively worked my summers after work to cut around trees and hand till the weeds so not to use any chemicals. I drove to and from work, [place] to [place], so this would pay off when I retire.
- So far I am only one that is having these problems although my son sees me depressed and it showing on his focus on school work. Last nite he had a hard time doing his homework, he was trying to finish off in the car ride to school. As it stands now I need to get out because this will not go the right way for us. I cannot function properly and will not have the ability to keep up the farm and work with this going on. I am done with it and will try to sell the farm.
- 11)I have cancelled my order on goats for keeping grass down around my orchard as I heard they are effected too. And my dog although less than a year urinates on our floor in the house.

#132

- 9)[symptoms] Dizziness, Unsteady, Nausea!
- [other] Ear problems – ongoing
- 10)[life altered] Noticeable/Significant change in energy
- Feels like a huge energy force directed at my property when wind is in certain direction pushing across the channel between [place] and [place].
- Sounds like a jet engine is headed for my house at night. Wakes me up.
- Feel Different. Unbalanced. Stressed. Sleep Deprived. Depressed. Sad.

Date Tabulated: June 23, 2010**#133**

9) [other symptoms] Lack of focus – Lack of Concentration – Memory loss – High Blood Pressure – Nausea – Feeling of Fullness in the Head – Fullness Feeling in the ears

[approached doctor] Weekly pain clinic and migraine treatments. Pain medication for migraine. Nausea medication. Anti – hypertensive medication. Anti – depressant medication. Several types of pain medication. Acupuncture and Chinese Medication. Acupuncture bi-weekly.

10) [life altered]

- 1) Lost my career, which I loved dearly. It was a part of my life since age 18. A huge loss.
- 2) Lack of sleep has caused an enormous amount of stress; has impacted my everyday life from everyday appointments to social events + friendships; routines of living such as shopping, house cleaning, gardening; entertaining and family gatherings.
- 3) I was an avid reader but I cannot sit and concentrate to read a book.
- 4) I'm exhausted most of the time.
- 5) I feel tense all the time.
- 6) My ill health has become a major focus of my life and I fear a major fear of having a stroke!
- 7) I don't have people in my home anymore.
- 8) All our needed home renovations are on hold.

#134

10) [life altered] The visual impact around our home has been very negative as well as at our cottage off the western shore of [place].

Noise is disturbing at both places, especially at 3 or 4 am when all else is quiet especially with south or southwest (prevailing) winds ->directly from 5 neighboring turbines to our bedroom window which has to be open during summer.

Stress level is high because of property value + saleability – we will need to sell in the near future.

#110A - Update for 110

10) [life altered] – many health problems

- vibrating in torso
- no sleep – always tired
- thumping in ears
- cannot enjoy our lives like before
- feel violated
- my mother has lived with us since Aug./08 but is moving to a 1 bedroom apartment on June 1, 2010 because since turbines were turned on she has had vertigo, her bed vibrates + this frightens her, her blood pressure is lower than usual – when she visits my sister in Kitchener she does not have these symptoms.
- we cannot enjoy nature
- fear for the safety of visiting relatives and friends when they come over
- cancelled plans for a family reunion

WindVOiCe© is an independent, self-reporting health survey conducted by volunteers.

WindVOiCe© is published on various web sites to facilitate its distribution

March 2011

- we are a 13 acre property surrounded by industrial wind turbines
- I love my job but it's difficult often because of all of this.
- * there are 34 turbines within a 3 km radius of our property.
- we are sad, frustrated, tense, ill, vibrating people
- our lives are on hold – it's horrible

#111A- Update for 111 [comments by spouse]

9) [other symptoms] pounding or thumping in ears (head)
ears (tinnitus)

had many heart, lung tests (inconclusive, can't explain why he feels like this

Date Tabulated: July 12,2010

#135

[life altered] I think our way of life has changed

We can't look out of a window in our home without looking at wind mills
from my back deck we can count 72 Windmills.

my property value has gone down

at the O.M.B. hearings in [place] a few years ago they [wind company] admitted that property values
would go down 30 percent so my home and farm was valued at \$400,000 due the math.

This stuff bothers people

it doesn't have to be noise or other things

our township is a mess not just windmills but monster Power line at my door step.

There is 110 Windmills in [place] twp.

there are 6 turbines on the home farm of the farms who have them on their land

they put them on grass farms not near their home

also ownership of most farms are by people who don't even live around here. They put the turbines on
good farm land with roads running all over the farm

so much for protecting farm land. Sorry for my spelling

Date Tabulated: January 14, 2011

#136

[health affected] Yes I do

[approached doctor] Have been prescribed medication to help me sleep

[life altered] We moved in our house 16 years ago because it was a small village, quiet and a great place
to raise our children. A couple of years ago wind turbines were erected all around us and our quiet
village was no longer, I loved sitting on either my front deck or my back deck on the house now the
noise of the turbines have ruined that small pleasure, most people anywhere open their windows in the
evenings to let their homes cool down in the summer Well when the turbines are running we have to
close our windows for noise and depends where we are in our house even with windows closed I can

still here the turbines. The turbines woke me up when trying to sleep and because of that I wasn't sleeping well, and I was getting so upset I began hating my home, but like anyone that reads this we all need a place to sleep. With the lack of sleep came headaches, body aches all likely from stress.

#137

[life altered] We d

We Don't use our backyard. We Sold our hot tub we had. We don't even have Patio Furniture in the back yard. We can not open windows when the weather is good. The NOISE is too Loud, Very Distracting. At night we can't open windows to cool the house in summer. Noise is too Loud. Have to leave the Air Conditioner on which costs Money. Interrupts our sleep almost every night. My husband keeps me awake and in turn we both wake up not very Rested. Very stressful to Deal with on an ongoing basis. Always on my mind, because we can always hear them. My husband has lost all motivation to do any thing around the house. He does not want to cut the grass or any small tasks. This is Very Frustrating.

#138

[other symptoms] Dizziness & off-balance; memory.

[approached doctor] ecg, ecogram, cat scan on brain, carotid Doppler, stress test, ear/nose/throat specialist(vertigo), blood tests, urine tests(adrenal gland problem), wearing heart monitors for palpitations and blood pressure.

[life altered] The 1st Phase was about 3km. from my home & I didn't have any of these symptoms and I was an extremely healthy person.

Since the 2nd phase has gone up (about 600m) from my house, these symptoms have gradually developed.

I don't know whether it builds anxiety & hence stress & you begin to imagine that you have all of these side affects or what!!

But I feel very tired & unhealthy now and the Doctor is doing all of these tests on me because they don't know what is the problem or if there is one.

I can't sleep in the large master bedroom that was added to the south end of my home. because the windmills are so loud many nights.

[pets or livestock] None.

#139

[approached doctor]Yes, Doctor doesn't believe the wind turbines are the problem. Why, now do I have these problems just 1 ½ yrs after the wind turbines have been running

[life altered] I no longer have the quiet peacefully life I once had. I cannot go outside my home without hearing the turbines we have two of them on east and west sides of our home. We are surrounded by turbines we have 115 turbines in our area and the sub station is ½ mile down the road. If production of power increases we will have to move. We are 2 acres of severed land around these windmills.

We are experiencing mild headaches, heart palpitations occasionally static electricity. I can't sleep some nights. Some days its 3-4 days of hardly any sleep.

#140

[other symptoms] memory problems

[approached doctor] wore an one day heart monitor. Dr. prescribed Larazepam a anti anxiety.drug. I experienced a seizure, I was down for a couple of minutes and was miserable the rest of the day.

[life altered] I lost a lot of sleep and feel always tired. Have no energy to do the work needed to be done.

When I been away from home I sleep well as soon I'm home, as the turbines ar running, I can not sleep well. Have memory problems.

Date Tabulated: February 21, 2011

#141

[approached doctor] not at this time

10) [life altered] low grade headaches on + off since turbines have started operating 5 weeks ago.

11) [pets or livestock] Livestock + pets but haven't saw any change in them at this time.

#142

9) [approached doctor] not at this time.

10) [life altered] The onset of anxiety and low grade headaches are making it difficult to concentrate and I feel "scattered" most of the time since the turbines started operating 5 weeks ago.

11) Last evening I had my donkey die from heart failure. I lost another mare Dec.22 from a massive heart attack!!!!

#143

8) [health altered] yes – they have robbed from me the pleasure of living @ my location

9)[approached doctor] I have asked about my sleeplessness – My nurse practitioner suggest this is due to my onset of menopause – also have knee pain almost every day. – instead of ringing I have ticking – sense of fluid filled ears that comes & goes. Decongestants help but not for long.

10) [life altered] –cannot go a day without looking @ what the turbines are doing & what direction they are pointing & I check w a hand held meter the noise levels & record these when I find the noise disturbing. – Range 38 to 54 dBA. 52-69dBC

symptoms seem to be increasing over time.

I thought I would be able to shut the turbines out once I accepted they were there but I find it completely the opposite. The visual impact is over whelming

I have also developed teeth grinding due to the stress which occurred approx. 6 months prior to turbines starting operation. I now must wear a mouth guard.

-My relationship w my family is sometimes very stressful. when I try to talk about the turbines they shut down, now I feel I must suffer in silence. I'm starting to hear a slight high pitched noise

MOE has been to check & refused to take readings when I requested if I could take pictures. I must now request for reports through an FOI request. I have been regularly calling the SAC number

11) [pets or livestock] Dog – Large Lab who whines to go out, yet stands there & gazes @ the turbines than wants back in – several times a day.

OTHER RETURNS (Out of Province):

Date Tabulated: February 20, 2010:

#1001

7) [time at property] 9 yrs. (off the grid) make electricity from the sun For past three years having to deal with nearby wind turbines.

8) {health affected} Absolutely

9) [Excessive tiredness] possibly [depression] possibly

[other symptoms'] Fortunately, these problems or symptoms only occur when the wind is strong (40 km/hr. minimum) and if wind is from the NW (prevailing) This puts us downwind from the noise disturbance.

[approached doctor] No. A doctor would only prescribe medication. We are doing our best to live with it and consider ourselves fortunate we were able to stop the wind company from creating a full-blown wind farm, "in our backyard".

(10) [life altered] Nine years ago, my wife and I built our lovely home (off the grid) in the middle of our 14 wooded acres where we would be safe from any infringements from others. We succeeded in achieving total privacy along with peace and tranquility, living in harmony with nature.

That is, until the wind turbines were introduced to the top of the hill. So the answer to your question is definitely , yes.

(11) No pets or livestock. I would not subject a pet to the kind of torture and I don't think any food from livestock would be fit for human consumption.

Yours sincerely [name]

#1002

7) [time at property] nine years (1st Turbines started Turning May 2006.

10) [quality of life] Though we live quite a distance from the two turbines, during certain conditions (wind speed & direction) they can be very loud. When they are loud I feel very stressed out and irritable and the feeling gets worse as the day goes on. I have found myself going into my house (even on hot august days) closing all the windows and doors & turning the on radio so I can't hear the sound of the turbines. I'm covering noise with noise but at least that way I can relax for a bit. The only other alternative is to get in my car and drive away for a while (or for the day) Night time is the worst when they are loud. Because our house is very quiet the turbines have woken me up in the middle of the night & it is impossible to get back to sleep. All I can do is lay there & wait for the wind to change. (I sometimes think I can feel the sound as well as hear it) Luckily for us we don't have this loud noise from the turbines all the time. If we did I would have to move away. I feel sorry for the people who have to live so much closer than us. There are times when there is nowhere on our 14 acres that you can go to

get away from the noise & so we are not able to enjoy our land like we used to. (our house is very quiet because we get our power from solar panels)

11) No pets or livestock

#1003

7) [time at property] Visiting 3 days

8) [health affected] yes freq. Headaches

9)[approached doctor] Just visiting

#1004

7)[time at property] 27 years minus 3 ½ years (abandoned)

10)[life altered] My life has been shattered. We lost our house and home. Our family was divided. We nearly lost our health and I am just hanging on to my sanity. We have been unable to sell our house.

#1005

8) [health affected] A lack of sleep.

10)[life altered] A lot of things have changed because we were forced to move out of our home.

#1006

7) [time at property] 27 years minus 3 ½ years (abandoned)

9) [other] vibration in my lower legs

[approached doctor] Yes, he said he did not want to get involved.

10) [life altered] Our life as we once knew is gone forever. We have lost our home, our security, our well being, our sanctuary (home). Above all, our family has been divided.

There are no words to describe the hell we have gone through.

#1007

Child-Form completed by parent

7) [time at property] [age] years minus 3 1/2

10) [life altered] [name] had become extremely defiant and withdrawn. Her schoolwork suffered greatly. Her entire persona changed.

#1008, Child-Form completed by parent

7)[time at property] [age] years minus 3 ½ years

9)[symptoms] His eardrum burst.

[approached doctor] [name] went to see 2 naturopathic doctors and they felt the windfarm would be the cause of his changed behaviour.

10) [life altered][name] had a lot of difficulty dealing with the loss of his home and he missed the many friends he had to leave behind. The pain is still strong. [name] was unable to concentrate.

#1009, Child, Form completed by parent

7)[time at property] [age] years minus 3 ½ years

9) [approached doctor] [name] saw 2 naturopathic doctors who agreed that the windfarm was the probable cause of his change of behaviour.

10)[life altered] After 3 ½ years [name] still cries for his home. He cannot bear to let it go. I feel the same.

#1010

[how long at property] Symptoms experienced while living on Greek Island of Naxos for 5 weeks

[symptoms: headaches] sometimes [palpitations] sometimes

[other symptoms] nausea, High blood pressure/Physical weakness

[approached doctor] Yes, Naxos [Greece] hospital. HBP measured.

[life altered] Holiday on Naxos was negatively affected by health problems that became progressively worse over five weeks. When I have been there for only a few days I have not noticed symptoms.

My ability to walk long distances seriously curtailed – physical weakness quite marked.

[pets or livestock] No

#1011

[health affected] Oui depuis le jardin eole. 1 ans

[approached doctor] inalo therapluie cardiologue poumons [difficult to transcribe]

[life altered] fatigue palpitations, difficuté a dormir vent sud west surtout

[pets or livestock] J'en ai pas

#1012

[life altered] Nous sommes a l'extaimite d'un rang au dessus d'une montagne Rang 9. J'ai deux voisin a 100 metre c'était la paix. Quond, qu'il on installe les eoles notre havre de paix c'est l'effondre. Le bruits des edes m'agresse moi et ma femme nous etoin tranquilles. Visuellement c'est enfers. J'en ai 4 eole a cote de la moins. La nuit Je la'ai entends....etc

[pets or livestock] J'ai une petite chienne bichon maltain, quanel le vent souffre ouest les eole font beaucoup de bruit et ma chienne a peur eolle debers et elle tremble, Je suis obligé de l'accompagne.

[difficult to transcribe]

#1013

[child's health altered] Very much so

[other symptoms] anger, behavior yes yes

[approached doctor] Our Dr. is aware of the turbines & has been to our house to observe

[child's life altered] Within several days of the turbine start up he complained of headaches & problems sleeping. Now he often sleeps with 2 radios on plus a ceiling fan. He is a foster child we adopted so does see a counselor. More recent depression has been talked about. He has anger & discipline problems. The school had an elaborate system. Within a week he was on the worst of 4 levels. He often talks of shooting or using TNT on the turbines.

#1014

[distance from property] 1,000 ' from property line, 1560' from base of house – measured by wheel & range finder other Ts @ 2480 ' measured & 3 @ 3300' & total of 11 within 1 mile.

[life affected] very much so

[symptoms] crackling[in ears], No dreaming

[other symptoms] no motivation

last of 3 of 4 glucose levels high (109) increase of essential Tremor

cortisol level 254. after 21 day shut down of project level of 35.

[approached doctor] cortisol check and discussions

[life altered]There is no longer a quality of life

see attached. INSERT

[pets or livestock] We have a dog, black lab who was 6 yrs old when this began. I told my family "[dog's name] is acting like an old dog. He used to run around. He would lay around. at the same time I had no motivation & could not do simple tasks connected to home construction. He sleeps a lot.

INSERT**Health Effects We Feel From Living Near Industrial Wind Turbines**

13 year old son:- Can't sleep or interrupted sleep, headaches, tells us and teachers "it feels like my head is spinning 100 miles an hour. In general more anger than in the past. Most nights sleeps with one radio and some night two radios running to cover the turbine sound.

wife:-Headaches, lack or loss of sleep - often up in the middle of the night to read and try and get tired again due to either direct sound from the turbines or low frequency noise not heard but felt by the body. Ringing and buzzing in the ears. In early April, 2010 we went on a vacation to Montreal, Canada. It took 4 to 5 days for the ringing to go away. We came home after dark. When we turned on to our road she said, "The ringing is back". Updated July 19th, 2009. After being to the Dr. in January and advised to watch blood pressure went back today as it has been continuing to climb. Also gaining weight. Dr told my wife, lack of sleep will cause both of these issues. Now she has been prescribed a sleep aide to see if this will help first. If not then I will need to go on blood pressure meds. Also she (doctor) said that lack of sleep can cause heart disease and fibromyalgia. We know some people who have that and I certainly do not want this. ringing is 2 octaves above middle C ringing is louder when Ts are louder or faster.

[Name] - Tenseness, anxiety, occasional headaches (in the past rarely got headaches), light headed, unusual feeling in the base of the neck, nausea, anger (that elected officials have allowed this to happen) (anger from the constant sound), lack of motivation, tired most of the time, having trouble remembering names and facts, lack of feeling happy, not dreaming at home. Only dream when away from the wind farm which would show not getting into deep sleep or REM sleep. Added April 9th, 2009 Recently I have been experiencing chest pains. When I go away for a few days the chest pains go away. Crackling or hissing in my ears is now constant. I also have been gaining weight, especially the last month. In all 26 pounds since the turbines began turning even with eating less and not in the late evening. At question is my cortisol which I hope to have checked soon. Updated August 17, 2009: On Friday 8-14-9 I received the results from my Dr. from my cortisol check. I was told it is moderately high and recommended that I see an endocrinologist for further testing. I have now gained 27-37 pounds. During the worst sleep deprivation (July 29, 2009) my cortisol level was 254. It should be less than 100. On October 19th after all 86 turbines were shut down for almost 21 days and noticing that I had lost 17 pounds, I again tested my cortisol level and found it to be 35. More recently I get about 2 hours sleep a night. After that I am either consciously awake or toss and turn. Why YOU get a normal nights sleep you don't even think about the chemical changes and nourishment your body and brain during sleep. Now that my sleep is deprived I am learning. Those affects you can read about in other documents I will submit. One is from my federal health insurance while looking for an approved endocrinologist due to my high cortisol level. Updated 6-20-2010. I have blood tests about every six months to most specifically check thyroid levels

but other tests as well. This is the first time that my glucose level was above standards and a concern to my Dr. Diabetes is one of the diseases connected to sleep deprivation. Yes, I am concerned.

Our dog - He will walk down the sidewalk and look at the turbine because of the noise. I have commented to my wife and oldest son that "[dog's name] is acting like an old dog (he is 7) he walks around slow, sleeps a lot and does not have much motivation'. When I finally admitted and wrote down my motivation issues I realized our dog was experiencing the same.

This is due to five industrial wind turbines being erected within 3/4 of a mile from our home. One is 1560', one 2480', one is 3/4 of a mile and 2 are 5/8 of a mile. Occasionally I hear one to the east 7/8 mile away and one directly south 1 mile away. Sometimes the first three mentioned are equal in sound and can be heard inside the house sometimes in all rooms. Some say, "You can hear the train or you can hear traffic and that is not a problem". That is correct. That is not a problem, but the large, loud, industrial wind turbines emit a different sound, a constant sound that does not go away and a low frequency sound that penetrates the house and body that sometimes the body does not consciously hear, but feels.

You maybe know of Dr. Nina Pierpont. <http://www.windturbinesyndrome.com>. Most of the symptoms listed above we were experiencing before we even knew of Nina and her work.

On March 3 of 2008 I went out the door of our house and heard the sound of a jet flying over. It was not a jet. It was turbine #4 of the [wind company] industrial wind farm. The sounds we hear are at times like those not in the terminal at O'Hare airport, but if you were outside of the terminal hearing the sounds of jets taking off and landing. Sometimes the sound is not quite as loud and that of just a jet flying over, but never going away. The sound just continues. Sometimes it sounds like one or two Chinook helicopters lifting a heavy load. Turbines 4 and 73 are especially annoying at this sound. Remember they are 1560' & 2480 away respectively. Sometimes turbine 6 gets involved with the same sound. Turbine 6 is 3/4 mile away. Often turbine 6 is louder than turbine 4 and 73. Therefore I believe wind turbine siting needs to be at least 1 mile from a residence. Some in the medical profession feel 2km or 1.2 miles is a safe standard. Inside our home the thumping sound is loud and sounds similar to listening to your heart in a stethoscope. Sometimes it is just the whooshing sound. All these sounds are unacceptable and have completely taken away our quality of life.

The states sound standards are completely unacceptable. No one in the capital will answer the question who wrote the states model for wind turbine siting. Did [wind company] write them with the PSC's rubber stamping? Why is 50 decibels OK? It is not. It is way too loud. Sound pressure on the ears is not linear, but logarithmic. That means it is similar to the scale for measuring earth quakes. A small increase in the decibel reading is a large increase in pressure on the ears.

Wind energy is terrible inefficient. The 2nd quarter of 2008 the [name] project by [wind company] was 28% of it's capacity. The 3rd quarter only 17.5% of it's capacity. Mr.[name] the project manager for the [project] told me personally (project open house 2009) that wind turbines are designed to be 27-30% efficient. Why in the world are our legislators and government promoting such inefficiency while at the same time forcing car companies to increase there cafe standards?

It is very frustrating to hear the energy companies tell residents that the turbines make very little noise, can be barely heard at 1000' away, make about as much noise as your refrigerator, not any louder than a conversation, sound like the wind blowing in the trees, sound like the waves on the ocean, that shadow flicker is minimal or can ("can" but isn't) be eliminated and actually increases property values and government leaders believe that BS. Lies, lies, lies. When the residents that are affected tell what life is really like in a wind farm they are called NIMBY's, put down and ridiculed. That is so frustrating. I have listed the sounds of living in a wind farm. Shadow flicker to many residents is a terrible issue. I can take you around showing you homes that have been for sale over a year, some with price reduced signs on them. No one wants to live in a wind farm. There are a variety of homes in this project for sale. Why don't energy company employees, renew [state]members and legislators buy some of these homes, stimulate our neighborhoods and see what life is like living in an industrial wind farm.

Wind energy will only produce one to two percent of our energy needs and is exorbitant in cost. If it is a viable source of energy take away the tax incentives, the production credits and other tax payer resources and see where private industry takes wind energy.

Renewable portfolio standards were voted on by our legislature in a hasty manner with no regard for potential health affects caused by industrial wind turbines. These renewable portfolio standards need to be reduced not raised and a moratorium on wind factory construction enacted until all the negative health affects can be solved. Lies spewed from wind company mouths need to be evaluated and ignored and victims of wind factories need to be listened to and not denounced.
